ProLite E2001WSV | 20" Wide

iiyama enters the 20" Widescreen market with the attractive E2001WSV, targeted towards the user that appreciates the higher 1680 x 1050 screen resolution but doesn't have enough space for a 22". The 5 msec panel achieves excellent results in gaming and video playback whereas the high contrast ratio offers crisp, vivid images in any application. A real all round performer! The Warm Black casing incorporates stereo speakers and the access controls for the On Screen Display Menu.

Megapixel describes the size of your desktop and therefore the amount of information your display can show. A lcd with a physical resolution of 9.2 mega pixels (3840 x 2400) can show 6 times more information than a display with 1.3 mega pixels (1280 x 1024). That means your desktop is about 600 percent bigger.
